[3D Systems Announces Conference Call and Webcast to Discuss Q3 and 9 Months 2010 Results](#)

3D Systems is a leading provider of [3D Printing](#), Rapid Prototyping and Manufacturing [parts](#) and [systems](#) solutions. Its systems, materials and parts service reduce the time and cost of designing products and facilitate direct and indirect manufacturing by creating actual parts directly from digital input. Its [3Dproparts™ service](#), the world's largest Rapid Prototyping and Direct Rapid Manufacturing parts service, delivers the broadest available range of precision plastic and metal parts and finished assemblies. These solutions are used for design communication and prototyping as well as for production of functional end-use parts.
